This versatile luminaire can be used anywhere in Passive Homes. The recess design reduces glare, and can be used in flat ceiling spaces. Utilise the 40° beam angle over task oriented areas such as kitchen benches and study desks, and the 60° beam angle for general illumination throughout living, dining and open plan areas. With Pure Colour CRI technology, these luminaires offer superior colour rendering, ensuring accurate skin tones and enhancing the richness of timber flooring. Available in sunset dimming, for lighting that gradually softens to create a warm, inviting ambiance that mimics the natural transition from day to night.
